No, I think I have received most of them from other sources.

Thanks
Mike

No problem – do you need any of the past emails or did Mark copy you?

Carson,
Thank you for the update. Would you please add the RPM, Mike Cirian, to the distribution list for the CalBag updates?
Thanks. Mark

Subject: Three week update February 01, 2016

On February 01, 2016 the DEQ received the most recent update from Carl Burnham of IRS Environmental on the quantity of Asbestos material removed from the CFAC site to date. The current cumulative total of 28,340 pounds of regulated asbestos waste remains steady from the last update. The waste disposal receipts for December indicate the removal of an additional 17,260 pounds of non-regulated asbestos material, yielding a "to date" non-regulated asbestos total of 471,440 pounds. Structures previously included in this removal include the West Rectifier, Rod Mill Building, Paste Plant, Quonset Hut, West Aluminum Unloader, and Compressor Building.

An asbestos project permit is in place through 2016 for the East Rectifier building. Demolition notifications remain in place for the East and West Rectifiers and Rod Mill Building. Indications are that this "selective" demolition will continue through the winter as weather permits.
